EYOB ALEMAYEHU

INFORMATION TECHNOLOGY

ABOUT ME

I am Eyob Alemayehu Admamu, a passionate and dedicated 3rd-year Information Technology student at Debre Berhan University. With a strong foundation in programming, web development, and networking, I am eager to apply my technical knowledge in a real-world setting through a summer internship.

My academic journey has equipped me with skills in Python, Java, SQL, and web technologies (HTML, CSS, JavaScript), along with hands-on experience in projects like a Bank Management System and Network Security Lab exercises. I am particularly interested in software development, and database management, and I constantly seek opportunities to expand my expertise through online courses and practical projects.

I am a quick learner, team player, and problem-solver who thrives in collaborative environments. My goal is to contribute to innovative IT solutions while gaining industry experience that will prepare me for a future career in technology.

I am excited about the opportunity to grow, learn from professionals, and make a meaningful impact in my field.

PROJECTS

Bank Managment System

- Developed a console-based application using Python and MySQL to manage Bank records.
- Features: Add, delete, update, and search customer data.

Ethiopian tourism web

- A dynamic tourism website for Ethiopia built with HTML, CSS, JavaScript, PHP, and MySQL (using XAMPP for local development). The website showcases Ethiopia's top tourist destinations, cultural heritage, and travel information, allowing users to explore attractions, book tours, and contact travel agencies

Personal Portfolio Website

- Built a responsive portfolio using HTML, CSS, and JavaScript.
- Hosted on GitHub Pages.
